

Last Mile Deliveries: Two Journeys
Scandit Smart Data Capture (With and Without)

Scandit-powered mobile apps turn smart devices and handheld computers into powerful time and labor savers. They help **optimize end-to-end processes and improve productivity**. Here’s how Scandit Smart Data Capture can make the last mile more profitable.

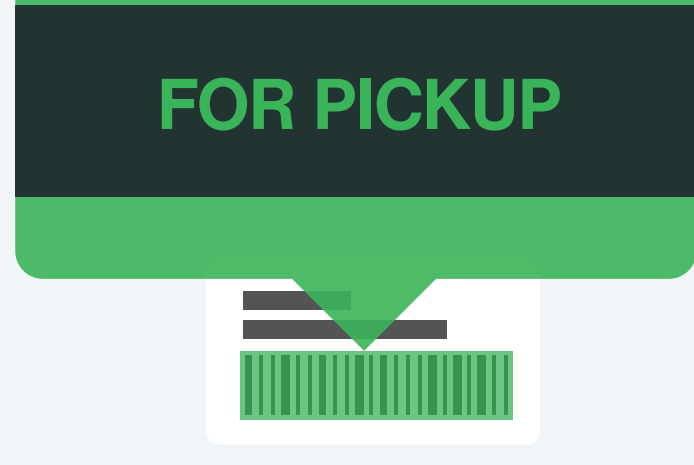

At the Depot

WITH SCANDIT SMART DATA CAPTURE

Fast, Efficient Sorting

Hover over multiple barcodes at once to help sort parcels with incredible efficiency.

Search & Find Parcels with AR Overlays

Scandit MatrixScan scans barcodes on multiple parcels at once to find and highlight the “special” package via an augmented reality (AR) overlay.

5%

On average, a single failed delivery costs \$17.78, and over 5% of all last mile deliveries fail.
Forbes 2022

Load Your Truck for Efficiency

Scan many parcels with a single scan and see at once if your loading list has been fully scanned.

WITHOUT SCANDIT SMART DATA CAPTURE

Lose Time Without Batch Scanning

Pick, scan, deposit. Repeat all day.

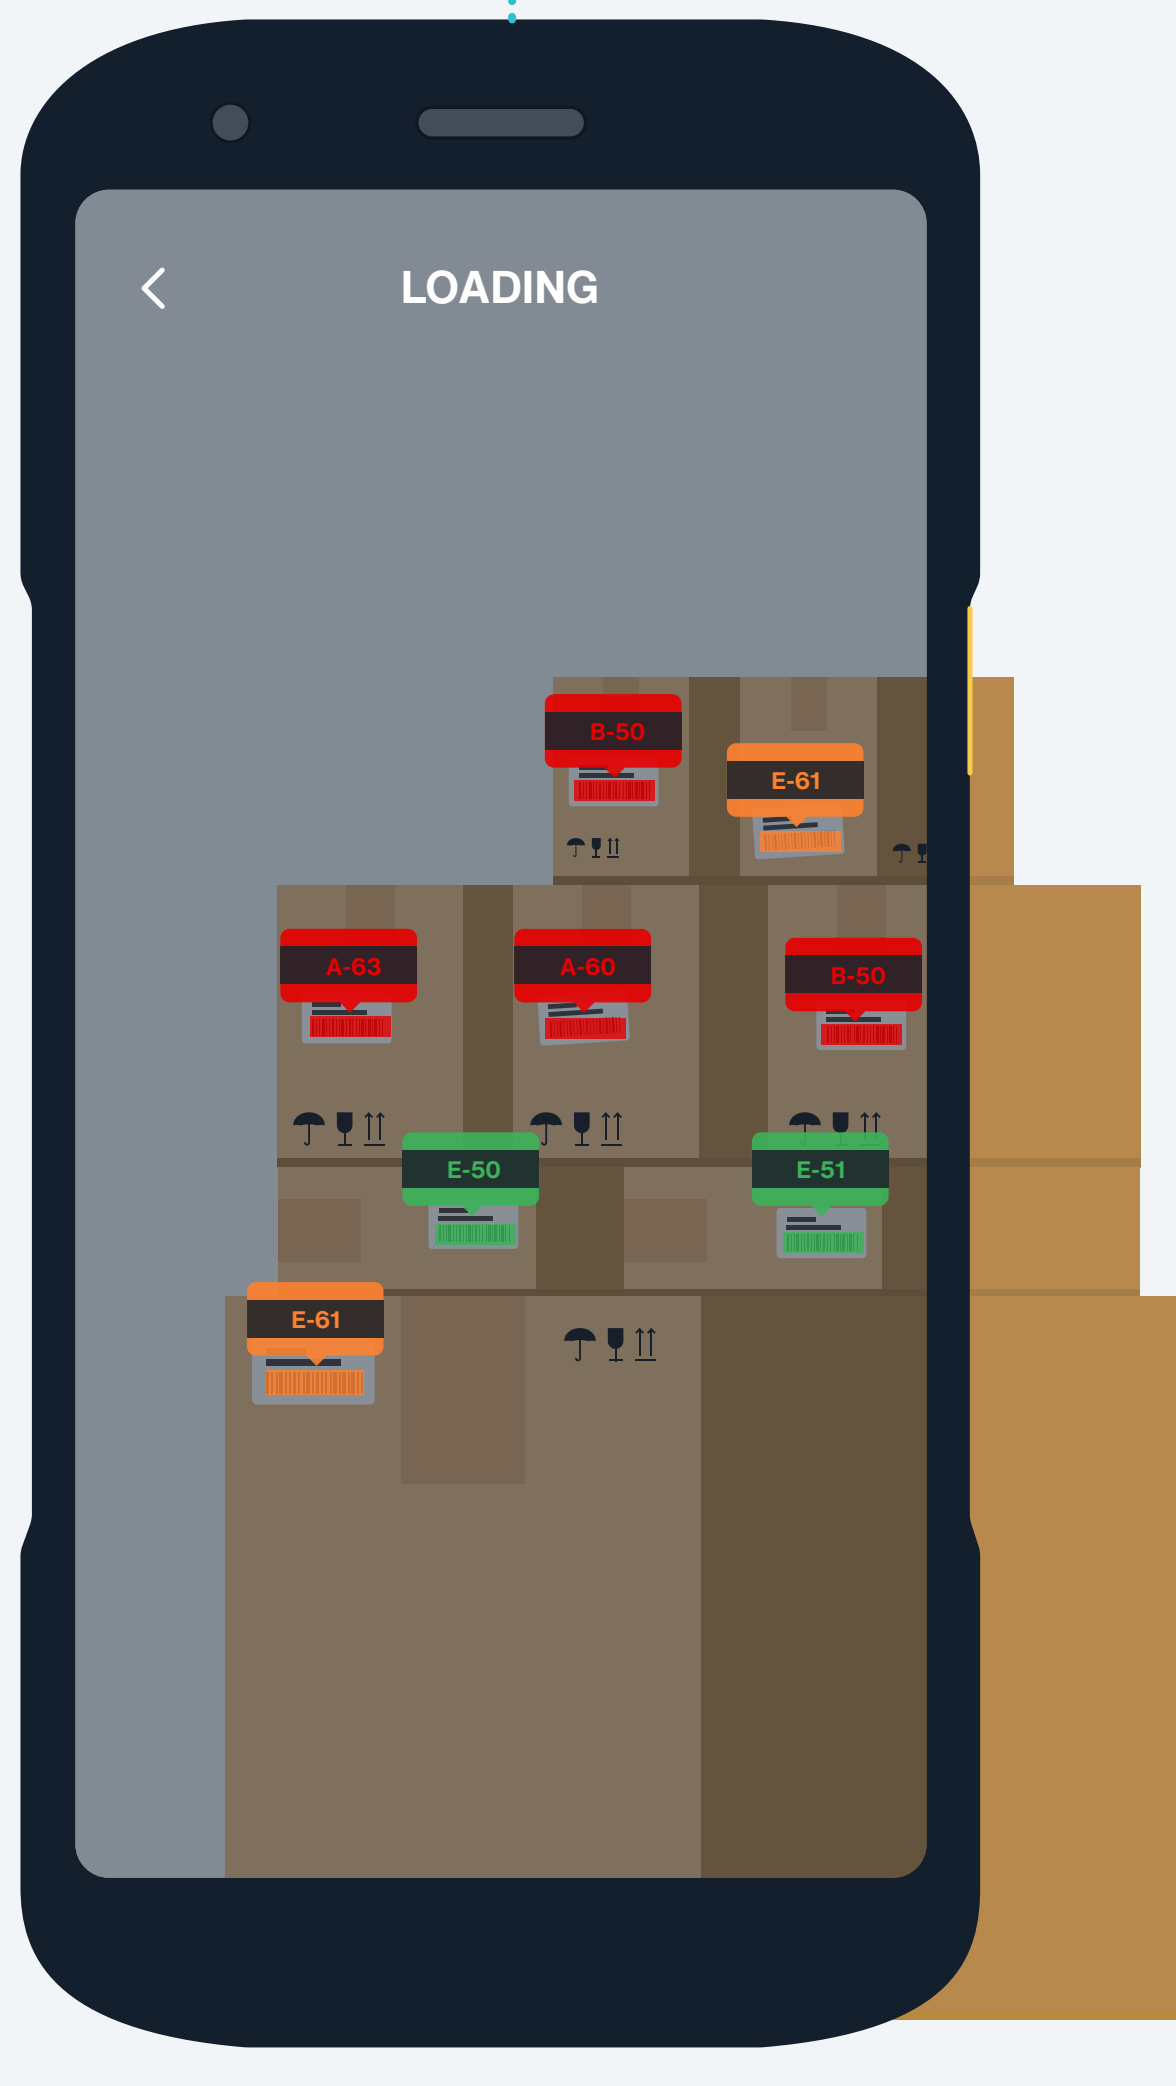

Waste Time Searching for Special Parcels

Without an AR overlay, good luck finding that ONE package by scanning every barcode.

Guess, Load, Hope

If you can’t load the van by route, add searching time for each stop.

On the Road

WITH SCANDIT SMART DATA CAPTURE

Fast Finds

Scan a parcel for real-time AR information. Access customer details, see real-time changes, find what’s next.

Special Delivery Information

One quick scan reveals real-time issues, requirements or special information needed before delivering a package.

Efficient Deliveries

Drivers can also scan a barcode or ID, take a photo or confirm proof of delivery – all on one device (smartphone or handheld computer) to reduce dwell time and boost compliance.

Identity Verified Delivery

A scan of the delivery label alerts the driver that it needs age-verification, or contains high-value or sensitive goods. Drivers can scan ID to confirm age, identity, and also detect fake IDs with 99.99% accuracy.

WITHOUT SCANDIT SMART DATA CAPTURE

Search for a Package

Pick, scan, search. No AR overlay means a surprise when a real-time change occurs.

Worry About Delivery Information

Hope that all the delivery requirements are met and haven’t changed.

Efficient Delivery?

Leave the box and don’t capture proof of delivery. With no signature, you’re risking friendly fraud.

Driver Checks ID

The responsibility is on the driver to check the ID. This means they have to pick up the document as well as verify it themselves.

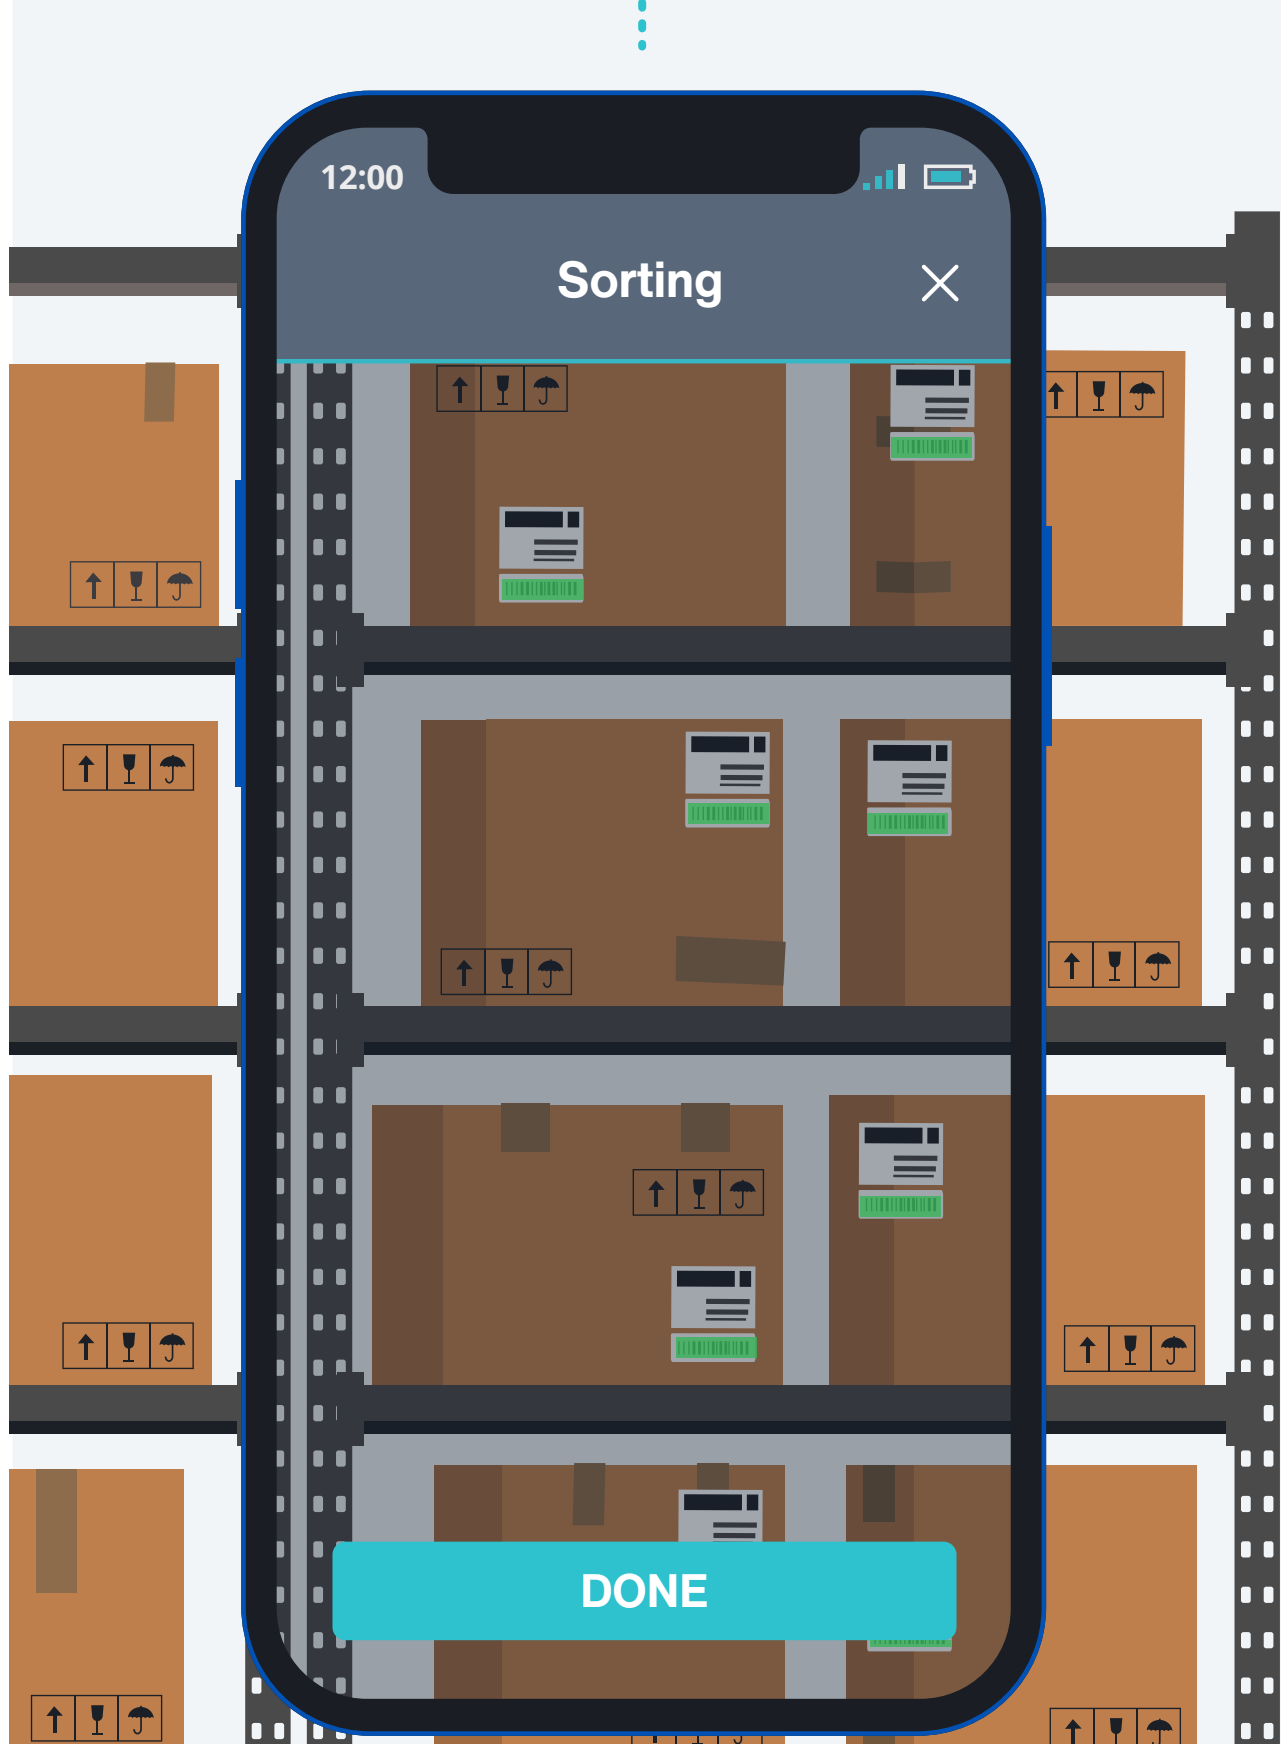

50%

Over 50% of a last-mile delivery driver's workday is spent on locating packages within the vehicle.
Lotwork 2024

At the PUDO Point

WITH SCANDIT SMART DATA CAPTURE

ID Verification on Pick Up

Employees can use ID Scanning capability on any camera-based device to scan drivers licenses and other identity documents.

Parcel Inventory Check

Build an instant inventory list with MatrixScan. Just point the device camera at the parcels and it will be created.

9.2%

Global parcel volume growth grew by 9.2% in 2024, following a 6.4% growth in 2023.
ResearchAndMarkets.com 2024

WITHOUT SCANDIT SMART DATA CAPTURE

Lost Time

Check the identification manually. Run the risk of losing time with manual entries or false parsings.

Manual Data Entry

Each parcel has to be scanned individually, taking additional time and taking the employee away from other tasks like serving customers.

Talk to Scandit for more **Last Mile** insights

Find out how Scandit Smart Data Capture can provide real-time control of delivery operations and introduce more speed and simplicity.
