# ID Scan

Extract data from over 2,500 ID cards, visa stickers, passports, driver's licenses, and military IDs in just 1 second

## PDF417 barcodes

**100% accuracy**
– US/Canada driver's licenses
– US military IDs
– Some country ID cards

## Machine Readable Zone (MRZ)

**99% accuracy**
– All passports & visas
– ID cards in many countries, including EU countries
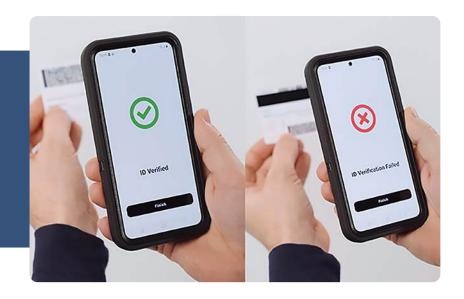

## Visual Inspection Zone (VIZ)

**95% accuracy**
– EU driver's licenses
– Front of US driver's licenses
– 100% accuracy for date of birth fields

# ID Validate

Fast, accurate fake ID detection for your frontline. Validates US driver's licenses and ID cards across all 50 states.

## 99.9%
ID authentication accuracy

## Built for busy frontline workers and customers

**Delivery of age-restricted goods**

Fast and compliant delivery of age-restricted products.

**Dealerships and vehicle rental**

Smooth, secure identity verification to protect high-value assets.

**Driver onboarding**

Fast and compliant delivery of age-restricted products.

**In-store age checks**

Fast and compliant in-store sales of age-restricted products.

# Security by Design

## We believe your data belongs to you and will never collect it unless specifically agreed

Scandit's ID scanning technology is built with on-device processing, avoiding PII storage and putting privacy and anonymization up front.

### On-device processing

Scandit software always processes on-device where possible.

Personal data is never collected or sent off device, unless absolutely necessary for operation.

### Data anonymization

All personal data is anonymized before transmission, where possible.

If Scandit doesn't need access, the data is end-to-end encrypted. If anonymization is impossible before transmission, data is stored in anonymized or encrypted forms only.

### Minimal data retention

Scandit never stores personal data indefinitely and personal data processed in the cloud is not stored. Personal data collected via analytics is deleted after 30 days.
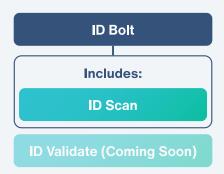

# Integration paths

## Built for every application, every level of effort

### Effortless integration, pre-built ID scanning

- Need to integrate into any web app

- Busy engineering team

- Do not want to maintain components and user journeys

### Total flexibility, requires time and resources

- Need a fully customized ID scanning experience

- Need to integrate into a mobile or web app

- Time and engineering resource available
